Company Profile

CyberTAN Technology, Inc. is a leading manufacturer of broadband and wireless networking equipment. Since its founding in June 1998, CyberTAN has energetically invested in R&D resources to provide professional OEM/ODM services for the home networking and communications market. In 2003, CyberTAN expanded its development efforts to the broadband and wireless fields, concentrating on broadband communications and wireless networking products for the small-office and home-office (SOHO) market. The fruits of these efforts have been numerous awards, affirmation from customers, and CyberTAN's position today as the largest manufacturer of SOHO routers in the world. Looking toward the future, CyberTAN, in keeping with its vision of "Bringing Broadband to Life," will build on its core competencies in broadband, wireless, telecommunications, and the digital home, expand into the small and medium-size business (SMB) router market, and as ever, strive to maximize production efficiency and generate the highest possible returns for its customers.

CyberTAN's products have secured substantial shares of the broadband communications and wireless networking markets. Simplicity and ease of use are among CyberTAN's principal design considerations, ensuring that people all over the world can make network connections quickly and easily. CyberTAN offers full lines of cost-effective products, including -

Wireless broadband products

- broadband routers, wireless broadband routers

Wireless communications products

- wireless LAN adapters, embeddable wireless LAN modules

Telecom CPE products

- xDSL routers, VoIP security gateways, ADSL2+ VoIP security gateways

Digital home products

- digital media adapters, embeddable digital media adapter modules, ZigBee gateways
- CyberTAN is headquartered in Taiwan's Hsinchu Science Park and has R&D, sales, and customer service centers in Taipei, China, and the U.S.A..

CyberTAN posted sales of US\$380 million in 2007 and currently employs more than 600 people worldwide.
