Main WiMAX Product/Service

WiMAX Rubber Ducky Antennas, Portable Antennas, MIMO Antennas, Indoor Antennas, Outdoor Antennas for IEEE 802.16 d/e

Business Classification

Manufacture Exporter Importer Dealer
 System Integrator IC Design R&D Service
 Others _____

Company Profile

Joymax Electronics Co., Ltd., was found in 1995, has been keeping the leading edge in the industry with continuous R&D facilities investment for antenna test and measurement.

Joymax designs and manufactures Antenna, RF connector and Cable Assembly products for today's major wireless communication applications, including Wireless Lans, WiMAX, Cellular Phone, Ham Radio, GPS, RFID, DAB/DMB, DVB-T, DVB-H, and ISM Band.

Joymax can satisfy any special requirement and develop new products for new technology in wireless communication. Now, Joymax has been developing MIMO antenna, GPS antenna, DVB antenna, and outdoor antenna, and presented to the market.

We exploit our expertise and equipment infrastructure to offer total solution with fast and accurate outcome. The spirit of Joymax is customer credibility, product reliability and continuous product innovation for future market evolution.

Joymax has built 3D chamber through MI Technologies, the world's leading supplier of all instruments used to accomplish Microwave Antenna Measurement. The chamber has shortened our research and development period meeting the rapid request of product design, which also enhanced product reliability and most importantly led to customer credibility.

" Let Joymax WiMAX your World. "
