Company Profile

JStream Technologies, INC is a subsidiary of New Kinpo Group, Registered in December 2003. The mission of JStream is to focus on broadband wireless technologies to support group sister companies and also the customers. JStream has provided products to the major Telco in Japan, North America and Australia based on the security home gateway and public wireless products.

For the public wireless product, JStream could offer both indoor and outdoor grade WiMAX and WiMAX+WiFi product in both fixed and mobile version to adopt different application environments. The flexible product design could provide WiFi AP (Access Point) with WiMAX, WiFi Mesh or Ethernet as backhaul. The outdoor version could meet IP67 and with temperature harden. To help customer's success is the top priority of JStream. With the strong backend support from the parent company, JStream could provide flexible service models to customer. JStream could provide CDM/ODM/OEM/EMS service models to the customers.
