Company Profile

Mobile Device Inc., funded in Sept. 2004, is composed of a group of talented young people from many different well-known IC and handset design companies, with passion, enthusiasms, and an ideal to build a first-rated IC design team in wireless communication industry. We are devoted to SoC design platform and total solutions. With outstanding team, strategic partnership, and prompt engineering support.

The first product from MDV is a highly integrated PHS baseband solution, and has been in mass-production phase.

Currently, MDV is developing 802.16d, 802.16e MIMO and 802.16m WiMAX SoC.
