Company Profile

Spectec established in 1994 and has been engaging to develop SDIO interface products since 2001. By now, we have successfully developed the most compact products and grown into the leading brand in the field of SDIO.

SDIO Accessories Products have been designed to function with low power consumption and most compact. Their purpose is to support and extend the function of mobile devices like PDAs (Palm, Pocket PCs, PDA Phones and Smart Phones).

SDIO Accessories Products to support these devices include SDIO Cameras Series, SDIO WLAN Card Series, SDIO Video Out Card Series, GPS Receiver Series, mini SDIO Bluetooth Card Series, SDIO WiMAX Series, mini SDIO ANT RF Card, SDIO UWB Card, SDIO RFID Card, ...etc.

For WiMAX solution, SPECTEC could offer USB Dongle, mini Card, half mini card, PC card, SDIO WiMAX and mini WiMAX card.

We have grown into the leading brand in the field of SDIO. Our objective is to provide cutting edge support for the growing mobile communication and personal digital assistant markets. Additionally, our product development will support OEM manufacturers as their requirements expand.

"Quality", "Service", "Diligence" and "exceeding expectation" are SPECTEC core values always, which enable SPECTEC to stay ahead of the time, to create opportunities and to expand steadily into IT field. To suit customer's demand and to bring friendly high-tech products to daily life are the strength of us to move forward and further.
