Company Profile

Universal Scientific Industrial Co., Ltd. (USI), established in 1976, is a leading global company in the DMS industry. USI's main products cover Computers & Peripherals, Visual Product Devices, Communications, Network Storage & Servers and Industrial & Automotive Products. USI focuses on product development and capability enhancement in the four above-mentioned strategic areas, through its advanced automated facilities and professional manufacturing process technologies. USI continues to enhance its excellent engineering capabilities by talent recruitment, development and retention. Leveraging its expertise and experience in micro-electronic packaging technology, USI's unique competitive advantage contributes to providing the best total solution for high-quality, value-added, cost-competitive products, with high-quality service to its customers.
