### Company Profile

Wistron NeWeb Corporation (WNC) was established in 1996. WNC focuses on the rapid development and innovative application of wireless communication products. It provides complete technical support for RF antenna, software and hardware, system integration, mechanical design, interface development, product testing and certification. With its advantage in product expertise and strategic management, WNC constantly provides user-friendly wireless communication products to global consumers and has become the best business partner for system operators and content service providers.

WNC divided its products into six business units, namely Direct Broadcast Satellite BU, STB BU, ADM BU, Mobile Communication BU, Networking Devices BU, and Antenna BU. It is a very unique wireless communication OEM supplier covering short, medium, and long range wireless communication technology and well adapted to managing technical integration and product design across different product lines
