Company Profile

Founded in 1991, OPNET Technologies Co., Ltd. (OPNET) specializes in designing, manufacturing and marketing telecommunication transmission products for access and inter-office networks. OPNET has its headquarter located in the Science-Based Industrial Park in Hsinchu, Taiwan and a branch office in Shenzhen, China. Major shareholders of OPNET include the United Fiber Optics Communications, Chailease Enterprise Ltd., China Development Bank, AsiaVest Partners, TCW/YFY Ltd., Chiao Tung Bank/Universal VC Investment Corp. and the employees. The management team of the company consists of several senior officers holding Ph.D. degrees and telecommunications product development experiences in the USA. The Industrial Development Bureau of the Ministry of Economic Affairs, Science Industry Park Management Bureau and National Science Institute have awarded and sponsored OPNET many development projects for its technical superiority and its dedications to innovative products.

The major product lines include digital loop carrier and access network systems, xDSL systems, and SDH/PDH multiplexers. OPNET's flagship product, the ULC-1000AN MSAN (Multiple Service Access Network), has a strong presence in China, Taiwan and many countries in Asia and Europe, with more than 3,000,000

subscriber lines installed worldwide. As an ISO9001 certified company, OPNET commits to providing flawless cost-effective solutions and satisfactory services to customers. All design and manufacturing phases are infused with rigorous quality control procedures. Through close communications with our customers, we want to satisfy your needs and be your partner to success.
